JOURNAL of ANALYTICAL and APPLIED PYROLYSIS

Subject Index

Acetylated lignin
Thermal decomposition of milled wood lignins studied by thermogravimetry/mass spectrometry, 171
Acetylenic copolymer
Microstructure characterization of acetylenic polymers by Curie-point pyrolysis/capillary gas chromatography/mass spectrometry, 55
Agave americana
Comparison of modern and fossil plant cuticles by selective chemical extraction monitored by flash pyrolysis-gas chromatography-mass spectrometry and electron microscopy, 585
Analysis
Analysis of products derived from the fast pyrolysis of plastic waste, 347
Analytical pyrolysis
Application of analytical pyrolysis to the characterization of *Eucalyptus* extractives and pitch deposits from a pulp mill, 501
Pyrolysis-gas chromatography of the macromolecular fractions of oxidized Organocell lignins, 543
Archaeology
Formation of long-chain ketones in archaeological pottery vessels by pyrolysis of acyl lipids, 267
Artificial neural nets
Determination of the geographical origin of Italian extra virgin olive oil using pyrolysis mass spectrometry and artificial neural networks, 159
Asphaltene
Thermal decomposition behaviour and structural characteristics of asphaltenes, 569
Automotive shredder residue
Pyrolysis of automotive shredder residue (ASR): Influence of temperature on the distribution of products, 383
Bacteria
The use of biomarker compounds for the identification of bacteria by pyrolysis–mass spectrometry, 111
Biodegradable polymer
Mechanistic aspects of the thermal degradation of poly(lactic acid) and poly(β-hydroxybutyric acid), 43
Biomass
Hydropyrolysis: a versatile technique for solid fuel liquefaction, sulphur speciation and biomarker release, 91
Reactivity of char from pyrolysis of birch wood, 491
Temperature impact on the formation of tar from biomass pyrolysis in a free-fall reactor, 481
Browning products
Pyrolysis of carbohydrate-derived macromolecules: its potential in monitoring the carbohydrate signature of geopolymers, 599
BTX-aromatics
Pyrolysis of a fraction of mixed plastic wastes depleted in PVC, 365

Carbohydrate diagenesis
Pyrolysis of carbohydrate-derived macromolecules: its potential in monitoring the carbohydrate signature of geopolymers, 599
Car fluff
Pyrolysis of automotive shredder residue (ASR): Influence of temperature on the distribution of products, 383
Catalysis of pyrolysis
Thermal decomposition of milled wood lignins studied by thermogravimetry/mass spectrometry, 171
Cellulose
Influence of flame retardants on the mechanism of pyrolysis of cotton (cellulose) fabrics in air, 511

Linear pyrolysis of cellulosic and plastic waste, 463
Pyrolysis of carbohydrate-derived macromolecules: its potential in monitoring the carbohydrate signature of geopolymers, 599
Chemical modification of polymer
Alternating olefin-carbon monoxide copolymers and their derivatives: Preparation and characterization by pyrolysis-gas chromatography/mass spectrometry (Py-GC/MS), 331
Chemical sludge
Characterization of sewage sludges by primary and secondary pyrolysis, 433
Chemometrics
Quantitative analysis of the adulteration of orange juice with sucrose using pyrolysis mass spectrometry and chemometrics, 135
Chlorophenols
Formation of chlorinated phenols under pyrolysis from a phenolic antioxidant used as plastics additive, 69
Coalently-bound biomarkers
Hydropyrolysis: a versatile technique for solid fuel liquefaction, sulphur speciation and biomarker release, 91
Coal
Hydropyrolysis: a versatile technique for solid fuel liquefaction, sulphur speciation and biomarker release, 91
Prediction of coal pyrolysis yields by maceral separation, 233
Pyrolysis of carbohydrate-derived macromolecules: its potential in monitoring the carbohydrate signature of geopolymers, 599
Compositional analysis
Characterization of copolymer type polycarbonates by reactive pyrolysis-gas chromatography in the presence of organic alkali, 321
Copolymer type polycarbonate
Characterization of copolymer type polycarbonates by reactive pyrolysis-gas chromatography in the presence of organic alkali, 321
Corynebacterium jeikeium
An outbreak of colonisation or infection by *Corynebacterium jeikeium* reanalysed by pyrolysis-mass spectrometry, 105
Cotton fabrics
Influence of flame retardants on the mechanism of pyrolysis of cotton (cellulose) fabrics in air, 511
Cuticle
Comparison of modern and fossil plant cuticles by selective chemical extraction monitored by flash pyrolysis-gas chromatography-mass spectrometry and electron microscopy, 585
Cyclotrimer
Microstructure characterization of acetylenic polymers by Curie-point pyrolysis/capillary gas chromatography/mass spectrometry, 55

Degradation
Hydrous pyrolysis of polystyrene, 451
Mechanistic aspects of the thermal degradation of poly(lactic acid) and poly(β-hydroxybutyric acid), 43
Thermal degradation mechanisms of some addition polymers and copolymers, 21
Degradation methods
Structural characterization of an Organosolv lignin by analytical pyrolysis and wet chemical degradation methods, 525
Degraded animal fat
Formation of long-chain ketones in archaeological pottery vessels by pyrolysis of acyl lipids, 267
Diphenylmethane
Structural characterization of an Organosolv lignin by analytical pyrolysis and wet chemical degradation methods, 525
Disposal of waste tyre
Pilot-scale experimental pyrolysis plant: mechanical and operational aspects, 403

Energy conservation
Pilot-scale experimental pyrolysis plant: mechanical and operational aspects, 403
Enhanced oil recovery
Plastics recycling coupled with enhanced oil recovery. A critical survey of the concept, 187
Eucalyptus globulus
Application of analytical pyrolysis to the characterization of *Eucalyptus* extractives and pitch deposits from a pulp mill, 501
Extra virgin olive oil
Determination of the geographical origin of Italian extra virgin olive oil using pyrolysis mass spectrometry and artificial neural networks, 159

Failures
Forensics, fakes, and failures: pyrolysis is one part in the overall armoury, 3
Fakes
Forensics, fakes, and failures: pyrolysis is one part in the overall armoury, 3
Fatty acids
The use of biomarker compounds for the identification of bacteria by pyrolysis–mass spectrometry, 111
Feedstuffs
Pyrolysis-gas-chromatography-mass-spectrometry for the analysis of forages and by-products, 243
Fire behaviour
Laser pyrolysis of polymers and its relation to polymer fire behaviour, 217
Flame retardance
Laser pyrolysis of polymers and its relation to polymer fire behaviour, 217
Flame retardants
Influence of flame retardants on the mechanism of pyrolysis of cotton (cellulose) fabrics in air, 511
Fluidized bed
Pyrolysis of a fraction of mixed plastic wastes depleted in PVC, 365
Food adulteration
Quantitative analysis of the adulteration of orange juice with sucrose using pyrolysis mass spectrometry and chemometrics, 135
Forage
Pyrolysis-gas-chromatography-mass-spectrometry for the analysis of forages and by-products, 243
Forensics
Forensics, fakes, and failures: pyrolysis is one part in the overall armoury, 3
Fossil record
Comparison of modern and fossil plant cuticles by selective chemical extraction monitored by flash pyrolysis-gas chromatography-mass spectrometry and electron microscopy, 585

Gasification
Reactivity of char from pyrolysis of birch wood, 491
Ginkgo biloba
Comparison of modern and fossil plant cuticles by selective chemical extraction monitored by flash pyrolysis-gas chromatography-mass spectrometry and electron microscopy, 585

Heating
Pyrolysis of carbohydrate-derived macromolecules: its potential in monitoring the carbohydrate signature of geopolymers, 599
Heavy metals
Characterization of sewage sludges by primary and secondary pyrolysis, 433
1-Hexyne
Microstructure characterization of acetylenic polymers by Curie-point pyrolysis/capillary gas chromatography/mass spectrometry, 55
High resolution mass spectrometry
The use of biomarker compounds for the identification of bacteria by pyrolysis–mass spectrometry, 111
Hindered phenolic antioxidant
Formation of chlorinated phenols under pyrolysis from a phenolic antioxidant used as plastics additive, 69
Homopolymers
Thermal degradation mechanisms of some addition polymers and copolymers, 21
Humus
Pyrolysis of carbohydrate-derived macromolecules: its potential in monitoring the carbohydrate signature of geopolymers, 599
Hydropyrolysis
Hydropyrolysis: a versatile technique for solid fuel liquefaction, sulphur speciation and biomarker release, 91
Hydrous pyrolysis
Hydrous pyrolysis of polystyrene, 451
Hydroxyl groups
Structural characterization of an Organosolv lignin by analytical pyrolysis and wet chemical degradation methods, 525

Influence of temperature
Pyrolysis of automotive shredder residue (ASR): Influence of temperature on the distribution of products, 383
Scrap tyre pyrolysis: Are the effluents valuable products?, 373
Irganox
Formation of chlorinated phenols under pyrolysis from a phenolic antioxidant used as plastics additive, 69

Kerogen degradation
Formation of radicals in thermal degradation of kerogen. A kinetic study, 553

Kerogen
Pyrolysis of carbohydrate-derived macromolecules: its potential in monitoring the carbohydrate signature of geopolymers, 599
Ketonic decarboxylation
Formation of long-chain ketones in archaeological pottery vessels by pyrolysis of acyl lipids, 267
Kinetic modeling
Kinetic modeling of polyethylene and polypropylene thermal degradation, 305
Kinetics
Formation of radicals in thermal degradation of kerogen. A kinetic study, 553
Hydrous pyrolysis of polystyrene, 451
Intrinsic kinetics of isothermal xylan degradation in inert atmosphere, 287
Reactivity of char from pyrolysis of birch wood, 491
Thermal decomposition behaviour and structural characteristics of asphaltenes, 569

Laboratory simulation
Formation of radicals in thermal degradation of kerogen. A kinetic study, 553
Laser pyrolysis
Laser pyrolysis of polymers and its relation to polymer fire behaviour, 217
Lignin oxidation
Pyrolysis-gas chromatography of the macromolecular fractions of oxidized Organocell lignins, 543
Lignin
Structural characterization of an Organosolv lignin by analytical pyrolysis and wet chemical degradation methods, 525
Linear pyrolysis
Linear pyrolysis of cellulosic and plastic waste, 463

Macerals
Prediction of coal pyrolysis yields by maceral separation, 233
Mass spectrometry
Thermal decomposition of milled wood lignins studied by thermogravimetry/mass spectrometry, 171
Thermal degradation of plastisols. Effect of some additives on the evolution of gaseous products, 201
The use of biomarker compounds for the identification of bacteria by pyrolysis–mass spectrometry, 111
Mechanism
Influence of flame retardants on the mechanism of pyrolysis of cotton (cellulose) fabrics in air, 511
Melanoidins
Pyrolysis of carbohydrate-derived macromolecules: its potential in monitoring the carbohydrate signature of geopolymers, 599
Micropollutants
Pyrolysis of automotive shredder residue (ASR): Influence of temperature on the distribution of products, 383
Micro-scale pyrolysis
Formation of long-chain ketones in archaeological pottery vessels by pyrolysis of acyl lipids, 267
Microstructure
Microstructure characterization of acetylenic polymers by Curie-point pyrolysis/capillary gas chromatography/mass spectrometry, 55
Mid-chain ketones
Formation of long-chain ketones in archaeological pottery vessels by pyrolysis of acyl lipids, 267
Milled wood lignin
Thermal decomposition of milled wood lignins studied by thermogravimetry/mass spectrometry, 171
Minimal environmental pollution
Plastics recycling coupled with enhanced oil recovery. A critical survey of the concept, 187
Modelling
Linear pyrolysis of cellulosic and plastic waste, 463
Monomer linkage
Microstructure characterization of acetylenic polymers by Curie-point pyrolysis/capillary gas chromatography/mass spectrometry, 55

Neural networks
Quantitative analysis of the adulteration of orange juice with sucrose using pyrolysis mass spectrometry and chemometrics, 135
Nucleotides
The use of biomarker compounds for the identification of bacteria by pyrolysis–mass spectrometry, 111
Number average molecular weight
Characterization of copolymer type polycarbonates by reactive pyrolysis-gas chromatography in the presence of organic alkali, 321

Olefin-carbon monoxide copolymer
Alternating olefin-carbon monoxide copolymers and their derivatives: Preparation and characterization by pyrolysis-gas chromatography/mass spectrometry (Py-GC/MS), 331
Organic sulphur
Hydropyrolysis: a versatile technique for solid fuel liquefaction, sulphur speciation and biomarker release, 91
Organocell lignin
Pyrolysis-gas chromatography of the macromolecular fractions of oxidized Organocell lignins, 543
Organosolv
Structural characterization of an Organosolv lignin by analytical pyrolysis and wet chemical degradation methods, 525

Partial least squares
Quantitative analysis of the adulteration of orange juice with sucrose using pyrolysis mass spectrometry and chemometrics, 135
Peptides
The use of biomarker compounds for the identification of bacteria by pyrolysis–mass spectrometry, 111
Petroleum generation
Formation of radicals in thermal degradation of kerogen. A kinetic study, 553
Phenylacetylene
Microstructure characterization of acetylenic polymers by Curie-point pyrolysis/capillary gas chromatography/mass spectrometry, 55
Pitch deposits
Application of analytical pyrolysis to the characterization of *Eucalyptus* extractives and pitch deposits from a pulp mill, 501
Plasticizers
Thermal degradation of plastisols. Effect of some additives on the evolution of gaseous products, 201
Plastics recycling
Plastics recycling coupled with enhanced oil recovery. A critical survey of the concept, 187
Plastic waste
Analysis of products derived from the fast pyrolysis of plastic waste, 347
Plastisols
Thermal degradation of plastisols. Effect of some additives on the evolution of gaseous products, 201
Polyester
Mechanistic aspects of the thermal degradation of poly(lactic acid) and poly(β-hydroxybutyric acid), 43
Polyethylene
Kinetic modeling of polyethylene and polypropylene thermal degradation, 305
Linear pyrolysis of cellulosic and plastic waste, 463
Polyethylenes
Kinetic model for the continuous pyrolysis of two types of polyethylene in a fluidized bed reactor, 419
Poly(β-hydroxybutyric acid)
Mechanistic aspects of the thermal degradation of poly(lactic acid) and poly(β-hydroxybutyric acid), 43
Poly(lactic acid)
Mechanistic aspects of the thermal degradation of poly(lactic acid) and poly(β-hydroxybutyric acid), 43
Polymer degradation
Laser pyrolysis of polymers and its relation to polymer fire behaviour, 217
Polymethylmethacrylate
Laser pyrolysis of polymers and its relation to polymer fire behaviour, 217
Polypropylene
Kinetic modeling of polyethylene and polypropylene thermal degradation, 305
Polystyrene
Hydrous pyrolysis of polystyrene, 451
Polyurethane
Laser pyrolysis of polymers and its relation to polymer fire behaviour, 217
Potsherds
Formation of long-chain ketones in archaeological pottery vessels by pyrolysis of acyl lipids, 267
Principal component analysis
Structural characterization of an Organosolv lignin by analytical pyrolysis and wet chemical degradation methods, 525
Pulping parameters
Structural characterization of an Organosolv lignin by analytical pyrolysis and wet chemical degradation methods, 525
PVC
Formation of chlorinated phenols under pyrolysis from a phenolic antioxidant used as plastics additive, 69
PY-GC/MS
Pyrolysis-gas-chromatography-mass-spectrometry for the analysis of forages and by-products, 243

Py-GC
Pyrolysis-gas chromatography of the macromolecular fractions of oxidized Organocell lignins, 543
Pyrolysis
Alternating olefin-carbon monoxide copolymers and their derivatives: Preparation and characterization by pyrolysis-gas chromatography/mass spectrometry (Py-GC/MS), 331
Analysis of products derived from the fast pyrolysis of plastic waste, 347
An outbreak of colonisation or infection by *Corynebacterium jeikeium* reanalysed by pyrolysis-mass spectrometry, 105
Formation of chlorinated phenols under pyrolysis from a phenolic antioxidant used as plastics additive, 69
Pyrolysis-gas chromatography
Characterization of copolymer type polycarbonates by reactive pyrolysis-gas chromatography in the presence of organic alkali, 321
Pyrolysis/gas chromatography/mass spectrometry
Microstructure characterization of acetylenic polymers by Curie-point pyrolysis/capillary gas chromatography/mass spectrometry, 55
Pyrolysis
Influence of flame retardants on the mechanism of pyrolysis of cotton (cellulose) fabrics in air, 511
Pyrolysis-mass spectrometry
An outbreak of colonisation or infection by *Corynebacterium jeikeium* reanalysed by pyrolysis-mass spectrometry, 105
Pyrolysis mass spectrometry
Quantitative analysis of the adulteration of orange juice with sucrose using pyrolysis mass spectrometry and chemometrics, 135
Pyrolysis
Mechanistic aspects of the thermal degradation of poly(lactic acid) and poly(β-hydroxybutyric acid), 43
Pilot-scale experimental pyrolysis plant: mechanical and operational aspects, 403
Prediction of coal pyrolysis yields by maceral separation, 233
Pyrolysis of a fraction of mixed plastic wastes depleted in PVC, 365
Pyrolysis of automotive shredder residue (ASR): Influence of temperature on the distribution of products, 383
Reactivity of char from pyrolysis of birch wood, 491
Structural characterization of an Organosolv lignin by analytical pyrolysis and wet chemical degradation methods, 525
Temperature impact on the formation of tar from biomass pyrolysis in a free-fall reactor, 481
Thermal decomposition behaviour and structural characteristics of asphaltenes, 569
Thermal decomposition of milled wood lignins studied by thermogravimetry/mass spectrometry, 171
Thermal degradation of plastisols. Effect of some additives on the evolution of gaseous products, 201
The use of biomarker compounds for the identification of bacteria by pyrolysis–mass spectrometry, 111

Quantitative analysis
Quantitative analysis of the adulteration of orange juice with sucrose using pyrolysis mass spectrometry and chemometrics, 135

Radial basis functions
Quantitative analysis of the adulteration of orange juice with sucrose using pyrolysis mass spectrometry and chemometrics, 135
Radical formation
Formation of radicals in thermal degradation of kerogen. A kinetic study, 553
Random copolymers
Thermal degradation mechanisms of some addition polymers and copolymers, 21
Reactive pyrolysis
Characterization of copolymer type polycarbonates by reactive pyrolysis-gas chromatography in the presence of organic alkali, 321
Reactivity
Reactivity of char from pyrolysis of birch wood, 491
Regional prediction
Determination of the geographical origin of Italian extra virgin olive oil using pyrolysis mass spectrometry and artificial neural networks, 159
Regression
Structural characterization of an Organosolv lignin by analytical pyrolysis and wet chemical degradation methods, 525

Retro-Diels Alder reaction
Alternating olefin-carbon monoxide copolymers and their derivatives: Preparation and characterization by pyrolysis-gas chromatography/mass spectrometry (Py-GC/MS), 331
Rotary kiln
Pilot-scale experimental pyrolysis plant: mechanical and operational aspects, 403
Run number
Microstructure characterization of acetylenic polymers by Curie-point pyrolysis/capillary gas chromatography/mass spectrometry, 55

Sampling
Temperature impact on the formation of tar from biomass pyrolysis in a free-fall reactor, 481
Scrapped tyre pyrolysis
Scrap tyre pyrolysis: Are the effluents valuable products?, 373
Secondary wax
Kinetic model for the continuous pyrolysis of two types of polyethylene in a fluidized bed reactor, 419
Sequence distribution
Microstructure characterization of acetylenic polymers by Curie-point pyrolysis/capillary gas chromatography/mass spectrometry, 55
Soil organic matter
Pyrolysis of carbohydrate-derived macromolecules: its potential in monitoring the carbohydrate signature of geopolymers, 599
Solid-phase adsorption
Temperature impact on the formation of tar from biomass pyrolysis in a free-fall reactor, 481
Stabilizers
Thermal degradation of plastisols. Effect of some additives on the evolution of gaseous products, 201
Structural characteristics
Thermal decomposition behaviour and structural characteristics of asphaltenes, 569
Synthesis gas
Plastics recycling coupled with enhanced oil recovery. A critical survey of the concept, 187

Tar cracking
Kinetic model for the continuous pyrolysis of two types of polyethylene in a fluidized bed reactor, 419
Tar
Temperature impact on the formation of tar from biomass pyrolysis in a free-fall reactor, 481
Technical lignins
Pyrolysis-gas chromatography of the macromolecular fractions of oxidized Organocell lignins, 543
Tetramethylammonium hydroxide
Characterization of copolymer type polycarbonates by reactive pyrolysis-gas chromatography in the presence of organic alkali, 321
The use of biomarker compounds for the identification of bacteria by pyrolysis–mass spectrometry, 111
Thermal cracking
Formation of radicals in thermal degradation of kerogen. A kinetic study, 553
Thermal decomposition
Characterization of sewage sludges by primary and secondary pyrolysis, 433
Thermal decomposition of milled wood lignins studied by thermogravimetry/mass spectrometry, 171
Thermal degradation
Intrinsic kinetics of isothermal xylan degradation in inert atmosphere, 287
Kinetic modeling of polyethylene and polypropylene thermal degradation, 305
Thermal degradation of plastisols. Effect of some additives on the evolution of gaseous products, 201
Thermal treatment
Plastics recycling coupled with enhanced oil recovery. A critical survey of the concept, 187
Thermoanalysis
Mechanistic aspects of the thermal degradation of poly(lactic acid) and poly(β-hydroxybutyric acid), 43
Thermogravimetry
Thermal decomposition of milled wood lignins studied by thermogravimetry/mass spectrometry, 171
Time-of-flight mass spectrometry
Laser pyrolysis of polymers and its relation to polymer fire behaviour, 217
Type II kerogen
Formation of radicals in thermal degradation of kerogen. A kinetic study, 553

Vinyl acetate
Thermal degradation mechanisms of some addition polymers and copolymers, 21

Water
Hydrous pyrolysis of polystyrene, 451
Wood extractives
Application of analytical pyrolysis to the characterization of *Eucalyptus* extractives and pitch deposits from a pulp mill, 501
Xylan
Intrinsic kinetics of isothermal xylan degradation in inert atmosphere, 287
